

OUR EXCLUSIVE AFRICAN LINEAGE DATABASE

African Ancestry's exclusive African Lineage Database is the largest and most comprehensive resource of African lineages available today. It includes over 30,000 maternal and paternal lineages from more than 30 countries and several hundred ethnic groups.

The data is a compilation of published sources, research collaborations and primary research. The populations sampled are based on direction from historians, anthropologists, linguists and other geneticists.

This extensive database allows us to find identical matches for approximately 85% of the people we test. For the remaining people, we find closely related lineages with greater than 95% confidence. To find out more about genetic ancestry testing, visit www.africanancestry.com.
